GUINUX
InteligênciA em TI

AI MANIFESTO · GUINUX · 2026

Everyone will have the same AI. Almost no one will have yours.

Models have become a commodity. What can't be copied is your company's context: data, processes, the way it decides. **Those who move now build an advantage. Those who wait fall behind.**

Since 2003

Claude Partner Network · Anthropic

Google Cloud Partner of the Year 2024

For companies above R$10M/year

01 · THE THESIS

Everyone buys the model. No one can copy your context.

The market spent two years debating which model to use. That debate has lost its meaning: leading models are converging and your competitor will have the same AI power you do. The advantage moved to how intelligence is applied, connected to your systems and fed with your data.

> "In a commoditized model market, proprietary data has become the only walled garden."
>
> Andreessen Horowitz (a16z) · 2026

33%

of enterprise software will include agentic AI by 2028, up from less than 1% in 2024.

Gartner · 2024/2025

15%

of day-to-day decisions will be made autonomously by AI by 2028.

Gartner · 2024/2025

40%+

of agentic AI projects will be canceled by 2027, usually for lack of method.

Gartner · 2025

US$2.6–4.4 tn

a year is what generative AI could add to the global economy.

McKinsey · 2023

Off-the-shelf AI doesn't put you ahead. It puts you in line.

And it's not vibe code. Building an app with AI got easy; running it in production, secure and stable, did not. Guinux brings more than two decades of service infrastructure and systems architecture.

02 · WHAT WE DO

Four fronts. One company.

OWN PLATFORM

AI you own, not rent

Model-agnostic (Claude, Gemini, GPT, Grok), with agents that execute. Model usage runs on your own account, with no markup.

OUR SPECIALTY

Legal intelligence pipelines

Legal AI startups are sweeping the market. Guinux protects your firm: its own pipeline, from document to finished brief, with verified sources, the lawyer in command and the client book staying yours.

MCP

Context superintelligence

AI connected to the ERP, CRM, Drive and legacy systems. Not just information: execution, with individual login, confidentiality and audit.

FULL IT

A secure foundation, one partner

Help desk, 24/7 monitoring, cloud, security and backup. Your AI runs on infrastructure we keep running ourselves.

03 · HOW WE WORK

Results, not hours.

Step 1

Fast, direct discovery

Focused on your pain. No fluff.

Step 2

A pilot in weeks

On real data, with human review where it matters.

Step 3

Production and evolution

Training, measurement and the next front.

And we prepare your team for the era of the **HIC, the High-Impact Individual Contributor**: specialists who use AI with method to deliver more, faster.

04 · IN PRODUCTION

Not a promise. Live systems.

Service portal	Bar association with 100,000 lawyers: one account with AI and real-time voice service.
Voice assistant	Checks the lawyer's records, answers and calls a human agent when needed.
Professional network	A verified legal network: 9,600 lawyers and 852 committees.
Learning platform	Continuing and mandatory training, with AI support.
Fee schedule	1,101 items that answer, calculate and draft agreements.
Engineering MCP	Naval and offshore industry: AI connected to the ERP, Drive and CAD files.
Mass sign-up	Class action: AI document reading, WhatsApp and a phone line.
Legal pipelines	At large law firms and in a financial institution's litigation.

Let's design your advantage.

A strategic conversation, peer to peer, about where AI opens an advantage in your operation. A specialist replies within 1 business day.
